

NORDSEC 2011

16th Nordic Workshop on Secure IT-Systems

26.-28. October 2011, Tallinn, Estonia

Call for Papers

The conference welcomes contributions in the form of **papers**, **short papers**, and **posters**. Since 1996, the NordSec conferences have brought together computer security researchers and practitioners from around the world, and particularly from the Nordic countries and Northern Europe. The conference focuses on **applied IT security** and is intended to encourage interaction between academic and industrial research. **Student papers and posters** are particularly encouraged. Submissions reporting **industrial or governmental experiences** are also encouraged and will be given special consideration. The post-proceedings of the conference will appear in the Springer **Lecture Notes in Computer Science** series.

Contributions should reflect original research, developments, studies and practical experience within all areas of IT security. With the theme "**IT Security in Governance**", this year's conference will emphasize policies, strategies and technologies related to the security and sustainability of processes executed by heterogeneous organizations, departments or organizational clusters of all sizes.

NordSec 2011 also welcomes contributions over a **broad range of topics in IT security**, including, but not limited to, the following areas:

- Applied cryptography
- Commercial security policies and their enforcement
- Communication and network security
- Computer crime and information warfare
- Hardware and smart card applications
- Internet and web security
- Intrusion detection
- Language-based techniques for security
- New ideas and paradigms in security
- Operating system security
- Privacy and anonymity
- Security education and training
- Security evaluation and measurement
- Security management and audit
- Security modeling and metrics
- Access control and security models
- Security protocols
- Social engineering and phishing
- Security usability
- Economics, law and social aspects of security
- Software security and malware
- Trust and identity management

Program Committee

Frederik Armknecht
Lizzie Coles-Kemp
Mads Dam
Simone Fischer-Hübner
Dieter Gollmann
Erland Jonsson
Svein Johan Knapskog
Igor Kotenko
Peeter Laud (chair)
Helger Lipmaa
Fabio Massacci
Chris Mitchell
Kaisa Nyberg
Kai Rannenberg
Heiko Roßnagel
Andrei Sabelfeld
Jaak Tepandi
Dominique Unruh
Risto Vaarandi
Jan Willemsen
Ender Yüksel

Important dates

31.07 abstract submission
06.08 full paper submission
01.09 short paper submission
15.09 notification of acceptance
01.10 pre-proceedings version
26.-28.10 conference
15.11 post-proceedings version
